Try our PopUp™ tools

pop up our handy tools without leaving your application!

Launcher III is a replacement for the built-in application launcher where applications are organized in tabs. Applications are easily moved from one to another tab, deleted or beamed by simply dragging its icon. More...

If you ever tried to do a simple calculation while working with some other application, then you know how it can be boring - start calculator, do a calculation, tap on the "Applications" button, start again your application and go to the point where you stopped. With **PopUp Calculator**, doing a calculation "on the fly" is like a breeze. More...

For Reverse Polish Notation fans, **RPN PopUp Calculator** is the right choice. It is similar to PopUp Calculator, but it has some additions - a simple forth-like script language, so you can write your own functions. More...

Use **PopUp Note** to add or view a MemoPad note without quitting the current application. More...

PopUp FreeTime is a HackMaster extension for creating appointment and a task (if you wish) without quitting the current application. It wakes up in the week view, so you can easily find your free time slot. More...

There's only one thing your Palm OS device doesn't have that your day planner or desk calendar does: a word, term, tip or joke for the day. Well, now it can with **Daily**.

Currency Calculator is a combination of unit converter and standard calculator with 12 digits precision, very easy to use. Up to 15 conversion categories can be defined with 200 items in each. Any category can also serve as a group of constants. More...

PopUp Names you to pull up the Address Book with a simple stroke, and when done go back to the application you were in. More...

PopUp Favorites is a HackMaster extension for easily starting your frequently used applications. More...

PopUp Time displays current time, OS version, battery voltage, free memory and Internet Time, without leaving the current application. It can be started automatically each time you turn on your Palm device. Backlight can also be started automatically, always, or in the night time. More...

PopUp Find is a great time-saving utility which displays system "Find" search results in pop-up windows, so there is no need to switch from the current application. PopUp Find has AddresssBook, DateBook, ToDo List and MemoPad viewers. Each of the viewers has a button to start the application which created that data. More...

Application Usage runs in the background and keeps a tally on the number of times different applications are used, the

PopUp and your choice of DpModules from a variety of titles. More...

total time those applications have been used, and a grand total time. More...
